

The International Journal of
**APPLIED
 ENGINEERING
 EDUCATION**

Editor-in-Chief: Michael Wald
Hamburg Educational Partnership
Germany

Contents

M. S. Wald	1	Editorial
W. M. Jordan	2	Academic misconduct: A student perspective
A. S. Blicblau	8	The modern engineering curriculum in materials
R. E. Brown and J. G. Wilson	15	A survey of operations research techniques used in U.S. Army research
A. G. Greenwood	20	Enhancing the coverage of simulation in the introductory MS/OR course: Needs, problems, and solution
J. E. Holt and D. F. Radcliffe	31	Some perspectives for integrating computers into design courses
H. L. Owen	35	Integrating design projects in electrical engineering curriculum: Case study in an undergraduate computer engineering laboratory
C. Umeagukwu and M. Chouchane	40	Microcomputers in the mechanical engineering microprocessor laboratory at Georgia Tech-part II
B. K. Hodge	51	Process path for simple mass addition in one-dimensional compressible flow
B. K. Hodge	56	Generalized one-dimensional compressible flow techniques
R. Y. Chen and R. J. Chen	64	An iterative method in one-dimensional compressible flow
E. Mahajerin	68	Computer implementation of the state variables method
A. K. Goel and M. D. Cobb	71	Innovative analysis of semiconductor junctions using a personal computer
Z. Liang and C. J. Quinn	76	Using CAD software to analyze spatial mechanisms
