

Editor-in-Chief: Michael Wald

*Dublin Institute of Technology
Dublin, Ireland*

**Special Issue: Mathematics Education of Engineers
Guest Editors: Shirley Pomeranz and Chung-Yau Lam**

Contents

| | | |
|---|---------|---|
| Shirley Pomeranz and Chung-Yau Lam | 401 | Guest Editorial |
| Sergei S. Sazhin | 402–405 | Assessment of Mathematical Elements in Engineering and Science Subjects |
| S. Askarpour and T. J. Owens | 406–410 | On the Non-uniqueness of Characteristic Vectors |
| G. Donald Allen, Jim Herod, Mark Holmes, Vince Ervin, Robert J. Lopez, Joe Marlin, Douglas Meade and David Sanchez | 411–416 | Strategies and guidelines for using a computer algebra system in the classroom |
| Douglas B. Meade and Allan A. Struthers | 417–424 | Differential Equations in the New Millennium: the Parachute Problem |
| Teri J. Murphy, Russell E. Goodman and Jonathan J. White | 425–431 | Using the WWW in Multivariable Calculus to Enhance Visualization |
| Donald B. Small | 432–436 | Core Mathematics for Engineers, Mathematicians and Scientists |
| Harald Pleyrn | 437–455 | Visualizing Free and Forced Harmonic Oscillations using Maple V R5 |
| Michael Rex Maixner | 456–468 | The Use of MathCad in Teaching Ideal Fluid Flow with Complex Variables |
| L. R. Mustoe & A. C. Croft | 469–476 | Motivating Engineering Students by Using Modern Case Studies |
| Rich Marchand and Timothy J. McDevitt | 477–485 | Learning Differential Equations by Exploring Earthquake Induced Structural Vibrations: A Case Study |
| Janet A. Taylor and Michael J. Morgan | 486–492 | Mathematics Support Program for Commencing Engineering Students between 1990 and 1996: an Australian Case Study |

The International Journal of ENGINEERING EDUCATION

EDITOR-IN-CHIEF

M. S. Wald, Dublin Institute of Technology, Bolton Street, Dublin, Ireland
Tel: (International +353 1) 4023635; Fax: (+353 1) 4023999; E-Mail: wald@dit.ie

1999 Subscription Rates (including postage and insurance)

Annual institutional subscription rate £290. Personal subscription rate for those whose library subscribes £75. For North American institutional subscribers \$475. Subscription enquiries should be sent to TEMPUS Publications, Dublin Institute of Technology, Bolton St., Dublin, Ireland. Tel: (+353 1) 4023635, Fax (+353 1) 4023999.

Back Issues

Back issues available from University Microfilms, 1 Apple Tree Square, Suite 1548, Bloomington, MN 55424, USA. Tel: +1 612 853 0225. Fax: +1 612 853 0287.

Copyright © 1999 TEMPUS Publications

Published 6 per annum

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying Information for Users in the U.S.A.

The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of \$3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, USA.

Permission for Other Use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is: 0949-149X/92 \$3.00 + 0.00.

The International Journal of ENGINEERING EDUCATION

AIMS AND SCOPE

This journal serves as an international interdisciplinary forum and source of reference for engineering education. A balance between papers on developments in educational methods and technology, case studies, laboratory applications, new theoretical approaches, educational policy and survey papers is aimed for. Comprehensive coverage of new education schemes and techniques makes the journal a unique source of ideas for engineering educators who are keen to keep abreast with latest developments in educational applications in all fields of engineering. The journal will cover engineering education news and open debates on engineering education policy related topics of transnational interest.

Some of the areas covered more extensively in recent issues are: CAD, CAE, computer applications in teaching thermodynamics, materials science, electrical engineering, new courses and curricula, engineering management, control engineering, mechanical engineering, engineering design, student evaluation and institutional accreditation.

Features are a series on world educational systems with reference to engineering and a software survey section. Special issues on topics such as computer-aided engineering, engineering thermodynamics and engineering design are published periodically.

NOTES FOR CONTRIBUTORS

Papers for inclusion in the Journal should be submitted in duplicate to the Editor-in-Chief or to the most appropriate member of the Board of Editors or the Editorial Board. The Editor-in-Chief should be informed by the authors of any submission made directly to a member of either Board. The papers should include detailed information on relevance of the material to engineering education. Only papers not previously published will be accepted and, once accepted for the Journal, must not be published elsewhere. Technical Notes, Letters-to-the-Editor and Book Reviews may also be submitted. In addition to the paper in manuscript form papers should also be submitted on a diskette suitable for IBM PC or Apple Macintosh. News items of transnational interest, including courses and workshops, should be submitted to the Editor-in-Chief. Selected papers and Journal information are available on the World Wide Web on <http://www.ijee.dit.ie>

Papers must be submitted in English.

A brief summary (not more than 100 words) of the scope of each paper must be sent with the manuscript.

Authors are requested to submit a brief biographical sketch of up to 100 words for each author. Biographical sketches will be published with the paper unless requested otherwise.

The text, and as much of the mathematics as possible, must be typed with double spacing and ample margins on successively numbered pages.

The manuscript and diagrams will be discarded one month after publication unless the publisher is requested to return the original material to the author.

All photographs, schematics and diagrams should be referred to as figures and should be numbered consecutively and not included in the typescript. Name(s) of author(s), figure number and an indication of the orientation should be written on the back of each figure. Line diagrams should be drawn clearly in black ink with open lettering and be of sufficiently large size to allow for the necessary reduction. Photographs should be kept to a minimum and submitted as glossy prints. It is preferred to have graphics on diskette in GIF format.

In the interest of economy and in order to avoid the introduction of errors, tables will be reproduced directly from the authors' manuscripts. In case of difficulty please consult the Photoreprographic Unit of your institution. The following points should be observed during their preparation.

1. Insert heavy rules at the head and foot of each table, and fine rules below column headings.
2. The type should be clear and even.

Captions for figures and tables must be given on a separate sheet and included at the end of the manuscript.

The journal follows Le Système International d'Unités.

All Greek characters and unusual symbols must be identified by name in the margin the first time they appear.

References in the text to published literature should be given by numbers in square brackets on the line and the references should be listed at the end of the paper in numerical order.

Journal references should be arranged thus:

1. L. A. Pipes, Matrix analysis of heat transfer problems. *J. Franklin Inst.* **263**, 195–206 (1957).

Book references should be given as:

2. P. H. Parkin and H. R. Humphreys, *Acoustics, Noise and Buildings*, p. 84. Faber, London (1961).

Abbreviations of journal titles will follow *World List of Scientific Periodicals*.

Proofs will be sent to the first-named author for correction, unless otherwise specified. Corrections must be restricted to printer's errors only. Other than these, any substantial changes may be charged to the author.

A selection of papers accepted for publication

Lagoudas, Whitcomb, Miller, Lagoudas and Shryock—Continuum Mechanics in a Restructured Engineering Undergraduate Curriculum

Cook—A Vector Approach to the Assessment of Undergraduate Engineering Courses

R.Natarajan—The Role of Accreditation in Promoting Quality Assurance of Technical Education

Lozzi, Briozzo—The Practical Optimisation of Machine Components

Levy—Engineering Education In The United Kingdom: Standards, Quality Assurance and Accreditation

Calkins, Egging, Scholz—Knowledge Based Engineering(KBE) Design Methodology at the Undergraduate and Graduate Level

Anderson, Bloom, Mueller, Pedler—Enhancing the Teaching of Engineering Differential Equations with Scientific Notebook

Bhattacharya—Examining Staged Enhancements for Thermodynamic Cycles to Improve Performance using an Intelligent Instruction Software

Ghosh—Electromagnetic Field Theory as a Basis for the Odd Parity Rule in Computational Geometry

Congleton, Chama—Low Budget Fracture Mechanics Laboratory

Ng—Creating a Multiple Choice Self Marking Engine on the Internet

Ertugrul—Towards Virtual Laboratories:a Survey of Labview based Teaching/Learning Tools an Future Trends

Holzer—Experiential Learning with Multimedia

Buckman—VI-Based Introductory Electrical Engineering Laboratory Course

Jensen—Quality Management: Danish Engineering Education

Heitmann—Quality Assurance in German Engineering Education against the Background of European Developments

Soyjaudah—A New Digital Course Enhanced by PC Based Design Projects

Chang, Fourney—Design Based Course Sequence in Statics and Mechanics of Materials

Olanson—Using Virtual Instrumentation to Develop a Modern Biomedical Engineering Laboratory
