

SPECIAL ISSUE

Volume 19 Number 1

Social Dimensions of Engineering Design

Guest Editors: Clive Dym and Langdon Winner

Contents

M. S. Wald	1	Editorial
Clive L. Dym and Langdon Winner	2	Guest Editorial
Clive L. Dym	3–5	Social Dimensions of Engineering Design . . . An Engineer's Perspective
Langdon Winner	6–8	Design as an Arena of Choice
<i>Social Issues and Themes in Design</i>		
Todd Cherkasky	9–15	Designing Experience
T. Govindaraj	16–24	Social and environmental perspectives in the design of engineering and service systems
T. L. Taylor	25–34	Intentional Bodies: Virtual Environments and the Designers Who Shape Them
William H. Wood	35–40	Integrating Social Issues into Design Theory
<i>Collaboration in Design</i>		
Bruce Corson	41–52	Leadership by Design and Design by Collaboration: Process for Illuminating 'The Box'
Renate Fruchter and Alicia Townsend	53–61	Multi-Cultural Dimensions and Multi-Modal Communication in Distributed, Cross-Disciplinary Teamwork
Judith Gregory	62–74	Scandinavian Approaches to Participatory Design
Eswaran Subrahmanian, Arthur Westerberg, Sarosh Talukdar, James Garrett, Annette Jacobson, Chris Paredis, Cristina Amon, Paulien Herder and Adam Turk	75–80	Integrating Social Aspects and Group Work Aspects in Engineering Design Education
<i>The Many Meanings of Design</i>		
Richard Evans	81–93	Design Design: A Theory of Design
Charles C. Gordon	94–98	A Selection of Sociologies: <i>The Sociology of Work</i>
Jesse S. Tatum	99–102	Junk, Pretty Junk, and 'Other Directed Design'
<i>Engineering Design Education</i>		
P. Hirsch, B. Shwom, J. Anderson, J. E. Colgate, S. Jacobson, D. Kelso, J. Lake and C. Yarnoff	103–109	Collaborating with Design Professionals and Industry to Build a Design Course for Freshmen
Barry Hymen	110–117	Public Policy and Engineering Design Education
Thomas R. Kurfess	118–123	Producing the Modern Engineer
E. J. Woodhouse	124–131	Overconsumption and Engineering Education: Confronting Endless Variety and Unlimited Quantity
<i>Product and Process Design</i>		
Shervin Ghaemmaghami and Larry Bucciarelli	132–141	Structured Methods in Product Development
Özgür Eris and Larry Leifer	142–152	Facilitating Product Development Knowledge Acquisition: Interaction between the Expert and the Team
Joseph A. Shaciwitz and Richard Turton	153–157	Educating Chemical Engineers in Product Design
Robert M. Counce, John M. Holmes, Ronald A. Reimer, Rita A. Heckrotte and Beth W. Alderson	158–162	Sustainable Development in Future Process Design and Analysis Education
<i>Institutional Issues</i>		
Joseph R. Herkert	163–167	Professional Societies, Microethics, and Macroethics: Product Liability as an Ethical Issue in Engineering Design
Gary Downey and Juan Lucena	168–176	When Students Resist: Ethnography of a Senior Design Experience in Engineering Education
Poul Kyvsgaard Hansen	177–182	Does Productivity Apply to PBL Methods in Engineering Education?
Frances Bronet, Ron Eglash, Gary Gabriele, David Hess and Larry Kagan	183–191	Product Design and Innovation: Evolution of an Interdisciplinary Design Curriculum
<i>Design in and for a Complex World</i>		
G. Wackers and J. Korte	192–205	Drift and Vulnerability in a Complex Technical System: Reliability of Condition Monitoring Systems in North Sea Offshore Helicopter Transport
S. J. Lukasik	206–212	Vulnerabilities and Failures of Complex Systems
Michael Black	213–226	Can We Design Ecosystems? Lessons from the California Rivers
<i>What have We Learned? What do We Recommend?</i>		
John W. Wesner	227–232	Key Learnings and Commitments from Mudd Design Workshop III
