

The International Journal of  
**ENGINEERING  
EDUCATION**

**CALL FOR PAPERS**

**SPECIAL ISSUE ON**

**ENGINEERING BEHIND TECHNOLOGY-BASED  
EDUCATIONAL INNOVATIONS**

**Guest Editors**

**Dr. Francisco José García-Peñalvo, University of Salamanca, Spain**

**Dr. Martín Llamas Nistal, University of Vigo, Spain**

Contributions are invited for a special issue of the International Journal of Engineering Education (IJEE) about engineering products that could be used for educational innovations.

The technological aspects are important in this special issue, but these advances would be insignificant if they do not lead to a positive impact on teaching and learning of engineering subjects.

Authors are encouraged to present the engineering behind the educational innovations, but it is mandatory to complement the technological description with an empirical study and an in-depth discussion about how the developed products improve engineering education.

These products may be related, but not limited, to:

- Remote laboratories
- Virtual laboratories
- 3D virtual worlds
- Mobile learning
- Augmented and virtual reality experiences
- Game-based learning
- Robots in the classroom
- Education software

**Important Deadlines**

Extended abstract (about 2 pages)

January 20, 2016
