Contents

Part I

Special Issue: Methodology for the study of PBL in Engineering Education

Guest Editors:

Anette Kolmos—UNESCO Chair in PBL in Engineering
Education Aalborg University, Denmark

Erik de Graaff—Delft University, the Netherlands

Xiangyun Du—UNESCO Chair in PBL in Engineering
Education Aalborg University, Denmark

Ahmad Ibrahim

Anette Kolmos, Erik de Graaff

Xiangyun Du

507 Editorial

508–510 Guest Editorial

Denis Bédard, Christelle Lison, Daniel Dalle
and Noël Bourin

Benoît Galand, Benoît Raucant and
Marine Frenay

Angela R. Bielefeldt, Kurtis G. Paterson,
and Christopher W. Swan

Wei Pan and Joseph Allison

Andreja Drobnič Vidic

Ersun Iscioglu and Izzet Kale

Anette Kolmos and Jette Egelund Holgaard

511–522 Predictors of Student’s Engagement and Persistence in an Innovative PBL
Curriculum: Applications for Engineering Education

523–534 Engineering Students’ Self-regulation, Study Strategies, and Motivational
Believes in Traditional and Problem-based Curricula

535–546 Measuring the Value Added from Service Learning in Project-Based
Engineering Education

547–553 Exploring Project Based and Problem Based Learning in Environmental
Building Education by Integrating Critical Thinking

554–563 Assessment in Problem-based Learning Incorporated into Traditional
Engineering Education: Difficulties and Evaluation

564–572 An Assessment of Project Based Learning (PBL) Environment Based on the
Perceptions of Students: A Short Course Case Study on Circuit Design for
VLSI

573–583 Responses to Problem Based and Project Organised Learning from Industry

Part II

Contributions in: Microprocessors, Programming, Applications of Physics,
Statistics, Students’ Motivation, Stress, Belonging, Curriculum Development,
Sustainability, and Innovation

U. Meyer-Baese, Guillermo Botella,
Encarnación Castillo and Antonio García

S. Ratnajeever H. Hoole

Jorge Bonache, Carmen Cousido and
Wilmar Hernandez

J. B. Lopes, C. Viegas and J. P. Cravino

J. Gil, A. L. Pérez, M. I. Suero, F. Solano
and P. J. Pardo

Reidar Kvadsheim, Mari Mehlen and
Harald Kittang

Wei Zhan and Jay R. Porter

Josep M. Mateo-Sanz, Agustí Solanas,
Dolors Puigjaner and Carme Olivé

Ali Rizwan, M. S. I. Ali and
Moeen-Ud-Din Saeed

Denise M. Wilson, Philip Bell, Diane Jones
and Lisa Hansen

Timothy L. J. Ferris

584–592 A Balanced HW/SW Teaching Approach for Embedded Microprocessors

593–601 Programming Skills in Graduate Engineering Classes: Students from
Disparate Disciplines and Eras

602–611 An Educational Methodology to Interpret the Entropy of a Source Based
on the Analogy between such an Entropy and the Mechanical Energy

612–627 Improving the Learning of Physics and Development of Competences in
Engineering Students

628–641 Evaluation of the Effectiveness of a Method of Active Learning Based on
Reigeluth and Stein’s Elaboration Theory

642–654 Web-Based Automatic Feedback on Assignments in Statistics: How Can it
Help Students Learn Statistics and Universities Reduce Costs?

655–666 Using Project-Based Learning to Teach Six Sigma Principles

667–680 Refining Statistical Problems: A Hybrid Problem-Based Learning
Methodology to Improve Students’ Motivation

681–686 Analysis of Factors Affecting the Stress Level of Engineering Students

687–698 A Cross-Sectional Study of Belonging in Engineering Communities

699–707 Bloom’s Taxonomy of Educational Objectives: A Psychomotor Skills
Extension for Engineering and Science Education
