

## Contents

### Section I

#### Special Issue

#### Computer Engineering Education

#### Guest Editor

**Eugenijus Kurilovas—Vilnius University, Lithuania**

### Section II

#### **Contributions in: Teaching Practices, Assessment, Teamwork, Motivation, Entrepreneurship, Innovation, Curriculum Development, Project-Based Learning, Biomedical Technology, Robotics, Industrial Engineering, Civil Engineering, Computer Engineering, Mechanical Engineering**

<b>Ahmad Ibrahim</b>	1065	Editorial
<b>Eugenijus Kurilovas</b>	1066–1068	Guest Editorial
<b>Daniel Toll, Tobias Olsson, Morgan Ericsson and Anna Wingkvist</b>	1069–1077	Fine-Grained Recording of Student Programming Sessions to Improve Teaching and Time Estimations
<b>Egle Jasute, Svetlana Kubilinskiene, Anita Juskeviciene and Eugenijus Kurilovas</b>	1078–1086	Personalised Learning Methods and Activities for Computer Engineering Education
<b>Anita Juskeviciene, Egle Jasute, Eugenijus Kurilovas and Jelena Mamcenko</b>	1087–1096	Application of 1:1 Mobile Learning Scenarios in Computer Engineering Education
<b>J. Ángel Velázquez-Iturbide</b>	1097–1106	GreedEx and OptimEx: Two Tools to Experiment with Optimization Algorithms
<b>Vladimiras Dolgopulovas, Tatjana Jevsikova, Valentina Dagienė and Loreta Savulionienė</b>	1107–1116	Exploration of Computational Thinking of Software Engineering Novice Students Based on Solving Computer Science Tasks
<b>Yoshiaki Matsuzawa, Motoki Hirao and Sanshiro Sakai</b>	1117–1127	Compile Error Collection Viewer: Visualization of Compile Error Correction History for Self-assessment in Programming Education
<b>Svetlana Kubilinskiene, Valentina Dagiene, Inga Zilinskiene and Eugenijus Kurilovas</b>	1128–1140	Empirical Study on Robotics Application in Lithuanian Schools
<b>Ekaterina Yagunova, Sergei Pozdnyakov, Nina Ryzhova, Evgeniia Razumovskaia and Nikolay Korovkin</b>	1141–1150	Evaluation of Difficulty and Complexity of Tasks: Case Study of International On-line Competition “Beaver”
<b>Jacqueline C. McNeil and Matthew W. Ohland</b>	1151–1159	The Influence of ABET Accreditation Practices on Faculty Approaches to Teaching
<b>Glenn W. Ellis and Yezhezi Zhang</b>	1160–1170	The Development of 21st Century Skills in the Knowledge Building Environment
<b>M. Rosario Perello-Marin, Pilar I. Vidal-Carreras and Juan A. Marin-Garcia</b>	1171–1181	What Do Undergraduates Perceive About Teamwork?
<b>Kali Prasad Nepal</b>	1182–1193	Simplified Framework for Managing Team Learning in Engineering Subjects
<b>Kyle F. Trenchaw, Renata A. Revelo, Katherine A. Earl and Geoffrey L. Herman</b>	1194–1207	Using Self Determination Theory Principles to Promote Engineering Students’ Intrinsic Motivation to Learn
<b>Rachel L. Kajfez, Holly M. Matusovich and Walter C. Lee</b>	1208–1221	Designing Developmental Experiences for Graduate Teaching Assistants Using a Holistic Model for Motivation and Identity
<b>Onnida Thongpravati, Alex Maritz and Paul Stoddart</b>	1222–1235	Fostering Entrepreneurship and Innovation through a Biomedical Technology PhD Program in Australia
<b>Justin L. Hess, Nicholas D. Fila and Senay Purzer</b>	1236–1249	The Relationship between Empathic and Innovative Tendencies among Engineering Students
<b>Patrícia Schrippe, Flaviani Souto Bolzan Medeiros, Andreas Dittmar Weise, Carla Hartmann Sturm and Jaíne Fatima Koschek</b>	1250–1259	Mapping of the Undergraduate and Graduate Curriculum in Industrial Engineering in Brazil

<b>Nicholas Loyd and Sampson Gholston</b>	1260–1267	Implementation of a Plan-Do-Check-Act Pedagogy in Industrial Engineering Education
<b>Young Jae Jang and Vina Sari Yosephine</b>	1268–1278	LEGO Robotics Based Project for Industrial Engineering Education
<b>Bárbara Rangel, Ana Sofia Guimarães, Ana Vaz Sá and Fernando Brandão Alves</b>	1279–1288	Integrated Design Concept in Civil Engineering Education
<b>Alberto Abelló, Xavier Burgués, M. José Casany, Carme Martín, Carme Quer, M. Elena Rodríguez, Oscar Romero and Toni Urpí</b>	1289–1312	A Software Tool for E-Assessment of Relational Database Skills
<b>Luca Di Angelo, Francesco Leali and Paolo Di Stefano</b>	1313–1324	Can Open-Source 3D Mechanical CAD Systems Effectively Support University Courses?
	1325	Guide for Authors
