

## Contents

### **Contributions in: Problem-Based Learning, Active Learning, Hands-On Learning, Global Engineer, Student Engagement, Multidisciplinary Learning, Transdisciplinarity, Interdisciplinary Skills, Evidence-Based Education, Motivation, Doctoral Research, Self-efficacy, Conceptual Modelling, Teaching Evaluation, Accreditation, Software Metrics, Software Engineering, Information Systems, Internet of Things, Engineering Design, Global Engineer, Educational Technology, E-Learning, Fluid Mechanics, Heat Exchangers, Stress Analysis, Hydrology, Energy Management**

<b>Ahmad Ibrahim</b>	1137	Editorial
<b>Prateek Shekhar and Maura Borrego</b>	1138–1148	Implementing Project-Based Learning in a Civil Engineering Course: A Practitioner’s Perspective
<b>Shane Brown, Kacey Beddoes, Devlin Montfort and Anne Baghdanov</b>	1149–1162	Engineering Students’ Fluid Mechanics Misconceptions: A Description and Theoretical Explanation
<b>Paul Golter, Bernard Van Wie and Laura Coon</b>	1163–1179	Capabilities of Desktop Scale Heat Transfer and Fluid Mechanics Equipment for Classroom Instruction
<b>Roger Carrick and Aleksander Czekanski</b>	1180–1188	A Review of Outcome-Based Education and the Use of Engineering Design Competitions to Improve Underrepresented Attributes
<b>Benjamin B. Wheatley, Kristine M. Fischenich, Lisa M. Abrams Sheryl A. Sorby, Harlal Singh Mali, Anil K. Jain and Tammy L. Haut Donahue</b>	1189–1198	An International Fellowship Experience for Engineering Undergraduates: Improving Technical, Teamwork, and Cultural Competency
<b>Rosa Estriégana-Valdehita, Roberto Barchino Plata and José-Amelio Medina-Merodio</b>	1199–1212	Educational Technology in Flipped Course Design
<b>Denise R. Simmons, Yincheng Ye, Nathaniel J. Hunsu and Olusola O. Adesope</b>	1213–1221	Development of a Survey to Explore Out-of-Class Engagement of Engineering Students
<b>Hsiu-Ping Yueh, Yi-Lin Liu and Chaoyun Liang</b>	1222–1232	Multidisciplinary Learning: Impact of Internal and External Factors
<b>Klavdiya Bochenina, Anna Bilyatdinova, Alexey Dukhanov and Gerassimos Athanassoulis</b>	1233–1241	Implementation and Deployment of Transdisciplinary Learning Environments during Short-term Educational Events on Computational Science
<b>Atila Ertas, Heather Greenhalgh-Spencer, Utku Gulbulak, Turgut Batuhan Baturalp and Kellilynn M. Frias</b>	1242–1256	Transdisciplinary Collaborative Research Exploration for Undergraduate Engineering Students
<b>Troy Hicks, Justin Bruner and Tolga Kaya</b>	1257–1270	Implementation of Blogging as an Alternative to the Lab Report
<b>L. C. Woollacott and J. van der Merwe</b>	1271–1282	A Phenomenographic Analysis of Students’ Experience of the Mohr Circle: A Case Study in Research-Led Engineering Education
<b>Erika A. Mosyjowski, Shanna R. Daly and Diane L. Peters</b>	1283–1296	Drivers of Research Topic Selection for Engineering Doctoral Students
<b>Masoud Ghodrat Abadi, David S. Hurwitz and Shane Brown</b>	1297–1306	Influence of Context on Item-Specific Self-Efficacy and Competence of Engineering Students
<b>Jean-Luc Martel, Kenjy Demeester, François Brissette, Annie Poulin and Richard Arsenault</b>	1307–1316	HMETS—A Simple and Efficient Hydrology Model for Teaching Hydrological Modelling, Flow Forecasting and Climate Change Impacts
<b>Keisha A. Villanueva, Shane A. Brown, Nicole P. Pitterson, David S. Hurwitz and Ann Sitomer</b>	1317–1334	Teaching Evaluation Practices in Engineering Programs: Current Approaches and Usefulness
<b>Lung-Sheng Lee, Hui-Min Ko and Mei-Tyng Wang</b>	1335–1344	Quality of Accreditation Services for Engineering Programs
<b>Miloš Milić, Siniša Vlajić, Ilija Antović, Dušan Savić, Vojislav Stanojević and Saša Lazarević</b>	1345–1360	Software Quality Standards and Lean Approach in Teaching and Learning Programming
<b>Fatih Gurcan and Cemal Kose</b>	1361–1368	Analysis of Software Engineering Industry Needs and Trends: Implications for Education

<b>Branislav Stevanov, Darko Stefanovic, Andras Anderla, Srdjan Sladojevic and Nemanja Tasic</b>	1369–1379	New Approach to Information Systems Engineering Study Program to Meet Industry Expectations
<b>Wen-Jye Shyr, Chien-Fu Chiou, Fu-Chun Yang and Po-Chi Li</b>	1380–1385	Energy Management Competency Development based on the Internet of Things (IOT)
	1386	Guide for Authors
