Contents

Contributions in: Analysis of the IJEE Impact, First Generation, Engineering Undergraduates, Relevance of Physics, Sustainable Design, Undergraduate Research, Gender, Inclusivity, Assessment, Sociotechnical Integration, PBL, Active Learning, Blended Learning, Motivation, Work-Integrated Learning, Course Development, Competition-Based Learning, First-Year Students, Instrument Development, Systems Thinking, Visual Communications, YouTube, Professional Skills, Constructive Alignment, Leadership

Ahmad Ibrahim	1145	Editorial
Cory Brozina, Andrew Katz and **Aditya Johri**	1146–1160	Taking Stock: Analysis of IJEE Publications from 1996–2020 to Examine Impact and Coverage of Topics
Ning Fang	1161–1173	A Non-Parametric Statistical Analysis of the Relationship Between College GPA and ACT Scores for First- and Continuing-Generation Engineering Undergraduates
Monica Quezada-Espinoza, Angeles Dominguez and **Genaro Zavala**	1174–1185	Academic and Professional Relevance of Physics: Comparing Perceptions of Engineering Students from Mexico and Chile
Weixia Gao, Wei Wang and **Jihong Yu**	1186–1200	Insights into Sustainable Design Education: A Bibliometric and Visual Analysis
A. A. Del Savio, L. M. Cáceres and **K. Galantini**	1201–1214	A Methodology for Embedding Research Competencies in an Undergraduate Civil Engineering Program
Mary Luz Mouronte-López and **Juana Savall Ceres**	1215–1230	Analyzing Enrollment in Information & Communication Technology Programs and Use of Social Networks Based on Gender
Fermín Sánchez-Carracedo, Ferran Sabate and **Karina Gibert**	1231–1243	A Methodology to Assess the Sustainability Competencies in Engineering Undergraduate Programs
Laura A. Gelles and **Susan M. Lord**	1244–1260	Pedagogical Considerations and Challenges for Sociotechnical Integration within a Materials Science Class
Kyle M. Whitcomb, Alexandru Maries and **Chandralekha Singh**	1261–1273	Examining Gender Differences in a Mechanical Engineering and Materials Science Curriculum
Liliana Fernández-Samacá, Oscar Iván Higuera-Martínez and **Camilo Andrés Sanabria-Totaitive**	1274–1288	Building Small Prototypes in a PBL Intervention for Learning Automatic Control Systems
Laura J. Leslie, Paul C. Gorman and **Sarah Junaid**	1289–1299	Conceive-Design-Implement-Operate (CDIO) as an Effective Learning Framework for Embedding Professional Skills
Jelena Milošević	1300–1312	Implementing a Blended Design Studio Model in Architectural Engineering Education
Kai Jun Chew	1313–1329	Interaction Between Learning Assessment and Student Motivation: A Scoping Review
F. J. S. Velasco, José-Ángel Diaz-Madrid, Inmaculada Arboleda-Guirao, Óscar de Francisco Ortiz, J. A. B Conesa, Nicolás Madrid Garcia, Andrés Dolón Payán, Carmen de Nieves Nieto and **Ricardo Teruel Sánchez**	1330–1342	Students' Perceptions of Key Competencies Supporting Work-Integrated Learning
Benjamin D. Chambers, Homero Murzi, Matthew James, David Gray and Holly M. Matusovich	1343–1358	Course Development in a First Year Engineering Program: The Interplay of Autonomy, Peer Relationships, and Content
Alicia Triviño-Cabrera, Antonio Jesus Yuste-Delgado, Juan Carlos Cuevas-Martínez and **Salvador Pineda**	1359–1370	Competition-based Learning in Engineering Degree Programs
Ahmed Ashraf Butt, Kadir Kozan and **Muhsin Menekse**	1371–1381	The Relationship between Students' Study Strategies and their Academic Performance in an Introductory Engineering Course with Standards-Based Grading

Karen E. Rambo-Hernandez, Rebecca A. Atadero, Christina H. Paguyo, Melissa Morris, Seoyeon Park, A. M. Aramati Casper, Blaine Austin Pedersen, Jeremy Schwartz (Graduate Student) and **Robin A. M. Hensel**	1382–1397	Valuing Diversity and Enacting Inclusion in Engineering (VDEIE): Validity Evidence for a New Scale
Yuzhen Luo, Kurt Becker, John Gero, Idalis Villanueva Alarcon and Oenardi Lawanto	1398–1413	Systems Thinking in Engineering Design: Differences in Expert vs. Novice
Uchenna Asogwa, T. Ryan Duckett, Amanda P. Malefyt, Lindsey Stevens, Gale Mentzer and **Matthew W. Liberatore**	1414–1428	Comparing Engineering Problem-Solving Ability and Problem Difficulty Between Textbook and Student-Written YouTube Problems
Maurice Danaher, Anthony Rhodes and **Ashley Ater Kranov**	1429–1440	Applying the Computing Professional Skills Assessment Method to ESL Students in a Computing Program
Bahar Memarian and **Susan McCahan**	1441–1453	Constructive Alignment Integrated Rating (CAIR) in the Assessment of Engineering Problem-Solving
Rebecca Komarek, Angela R. Bielefeldt and **Daniel W. Knight**	1454–1465	Influences of Engineering Students' College Experiences on Leadership Skill Assurance
	1466	Guide for Authors
