Section I

Special Issue

Ethics, Social Responsibility and Sustainability in Engineering Education

Guest Editors

Marc Alier Forment – Universidad Politécnica de Cataluña, Spain

**Miguel Ángel Conde – Escuelas de Ingenierías Industrial e
Informática, University of León, Spain**

Editorial	583
<i>Ahmad Ibrahim</i>	
Guest Editorial	584–588
<i>Marc Alier Forment and Miguel Ángel Conde</i>	
Experimental Education of Collaborative Design. The Case of an Inclusive Bus Stop for a Tourist Transportation Hub	589–599
<i>Manuela Pires Rosa</i>	
Teaching Essential Competencies for Social and Sustainable Engineering Design – Case Study of a Research-Oriented Master’s Seminar	600–610
<i>Ann-Kristin Winkens and Carmen Leicht-Scholten</i>	
Engineering Faculty Views on Sustainability and Education Research: Survey Results and Analyses	611–620
<i>Paul Gannon, Ryan Anderson, Carolyn Plumb, Douglas Hacker and Kerry Shephard</i>	
Assessment of Ethical, Environmental and Professional Responsibility Training of Civil Engineers	621–630
<i>Ester Gimenez-Carbo, M. Esther Gómez-Martín and Ignacio Andrés-Domènech</i>	
Embedding Ethics Throughout a Master’s in Integrated Engineering Curriculum	631–642
<i>Sarah Jayne Hitt</i>	
Teaching Topics of Responsibility and Sustainability in Large Engineering Classes	643–655
<i>Marie Decker, Ann-Kristin Winkens and Carmen Leicht-Scholten</i>	
Integration of Ethics, Sustainability, and Social Responsibility Components in an Undergraduate Engineering Course on Finite Element Analysis	656–662
<i>Gaganpreet Sidhu and Seshasai Srinivasan</i>	
A Case Study in Brazil and Spain about the Students’ Perception of the Gender Gap in Computing	663–672
<i>Alicia García-Holgado, Carina S. González-González, Ismar Frango Silveira and Francisco J. García-Peñalvo</i>	
Analytical Framework to Investigate Ethics, Social Responsibility and Sustainability in Engineering Project Management	673–683
<i>Laura Fernández-Robles, Manuel Castejón-Limas, Alexis Gutiérrez-Fernández, Francisco J. Rodriguez Lera and Camino Fernández-Llamas</i>	
Team-Based Learning to Improve Diversity and Inclusion of Environmental Engineering Students: A Mixed Methods Case Study	684–694
<i>Hong Yang</i>	
Exploring the Relationship between Students’ Trait Empathy, their Attitudes Towards Sustainability, and their Reflections on a Workshop on Sustainable Design	695–708
<i>Rohan Prabhu, Elizabeth Starkey and Mohammad Alsager Alzayed</i>	
Imagination and Moral Deliberation: A Case Study of an Ethics Discussion Session	709–718
<i>Yousef Jalali, Christian Matheis and Vinod Lohani</i>	
Stereotype Threat and Faultlines Based on Cultural Diversity in Engineering Education in Germany	719–726
<i>Edwin Semke, Wanda Theobald and Petia Genkova</i>	
Integrating Inclusivity and Sustainability in Civil Engineering Courses	727–741
<i>Kausar Jahan, Stephanie Farrell, Harriet Hartman and Tiago Forin</i>	
Leveraging Sustainability to Teach About Social Justice in Civil Engineering Curricula	742–755
<i>Tom Siller, Rebecca A. Atadero, A. M. Aramati Casper and Christina H. Paguyo</i>	

Section II

Contributions in: STEM, Teamwork, Psychological Safety, PBL, Big Data, Gender, Identity, Industry Skill Gap, Apprenticeship, Competencies Progress, Learning Modules, Computer Science, Manufacturing Engineering, Fluid Mechanics

Development and Evaluation of an Approach for Integrating Data Science Concepts into High School STEM Curriculum <i>Vytautas Štuikys, Renata Burbaitė, Giedrius Ziberkas and Ramūnas Kubiliūnas</i>	756–773
Dynamics of Mixed-Gender Teams in Engineering Education <i>Behzad Beigpourian and Matthew W Ohland</i>	774–785
Big Data + Business Administration: Applying Problem-Based Learning to Enrich the Design of Interdisciplinary Education <i>Lanxia Zhang, Chunfang Zhou and Xinbo Sun</i>	786–798
How Engineering Identity of First-Year Female and Male Engineering Majors is Predicted by Their Physics Self-Efficacy and Identity <i>Yangqiuting Li and Chandralekha Singh</i>	799–813
Integrating Hands-on Continuous Process Improvement Practices with Traditional Manufacturing Processes Lab <i>Truc T. Ngo, Paul J. Wiold and Troy T. Bui</i>	814–824
Comparison Between Apprenticeship Learning and Traditional Learning in Students of Mechanical Engineering Vocational Education: A Case Study in Slovenia <i>Martin Pivk and Boris Aberšek</i>	825–835
Progress of Student Competencies from Cornerstone to Capstone Design: A Longitudinal Study <i>John Crepeau, Michael Maughan, Steven Beyerlein, Dan Cordon, Matthew Swenson, Daniel Robertson and Sean Quallen</i>	836–848
Effectiveness of Hands-on Desktop Learning Modules to Improve Student Learning in Fluid Mechanics and Heat Transfer across Institutions and Program Types <i>Aminul Islam Khan, Negar Beheshti Pour, Kristin Bryant, David B. Thiessen, Olusola Adesope, Bernard J. Van Wie and Prashanta Dutta</i>	849–872
Guide for Authors	873
