Contents

Contributions in: Biomedical Engineering, Curriculum Change, Adaptability, Engineering Identity, Design Education, Industry Skills, Knowledge Maps, Self-efficacy, Assessment, Team Building, Multi-Institutional Collaboration, International Students, Cooperative Learning, STEM, Persistence, Undergraduates Mental Stress, Entrepreneurship, Innovation, Course Design, Competency, Participatory Learning, Digital Transformation

Editorial Ahmad Ibrahim	563
Aligning Biomedical Engineering Education with Industry: Graduate Needs and Curricula in Australia Zachery Quince and Patcharin Chen	564–572
Toward Measures of Faculty Adaptability to Curricular Change Hadi Ali, Jennifer Bekki, Rod D. Roscoe and Ann McKenna	573–585
Using a Storytelling Intervention to Develop Professional Identity in Undergraduate Engineering Courses: An Exploratory Study Eric Jankowski, Sara Adams, Krishna Pakala, Anne Hamby, Amber Warrington, Ulises Trujillo Garcia, Sam Schauer,	586–597
Liz Neeley, Brooke Heller and Patrick R. Lowenthal An Examination of Individual Attributes and their Impact on Team Creative Design Outputs Aoran Peng, Samuel Hunter and Scarlett R. Miller	598–615
Development of Low-Cost PLC Training Kit for Enhancing Industry-Relevant Skills and Certification: PLC-CertX Natt Siriwattananon, Nuchchada Kohpeisansukwattana, Pongthep Poungthong, Vitsanu Nittayathammakul and Songtham Deewanichsakul	616–626
Evolution and Trends in China's New Engineering Education Research Yaoguang Shi	627–637
The Impact of Outcome-Based Education on College Students' Self-Efficacy and Learning Engagement Dekui Li, Yi Li, Fan Zhou, Chengyou Li and Shubo Du	638–648
"Trying to Fit the New Square Peg into The Old Round Hole": Adaptation During a Time of Transition to Online Teaching Kacey Beddoes and Grace Panther	649–657
Impact of Team-Building Activities and Personality on Student Learning Outcomes in Capstone Design Course Hrushikesh Godbole, Elizabeth A. DeBartolo and Shun Takai	658–666
Fostering Multi-Institutional Collaboration in Engineering Research Centers: An Analysis through the Lens of Communities of Practice Hwangbo Bae and Joi-Lynn Mondisa	667–679
What Constitutes the Ideal Learning Environment for International Students Pursuing Engineering Studies in Japan? Yutaro Ohashi	680–687
The Effect of Peer Learning Environment on Academic Achievement and Character Education: A Case Study from Engineering Mechanics Course Xiaoyu Guo, Bin Sha, Tengfei Ma, Zihan Suo	688–696
Factors Hindering the Persistence of Chinese STEM Students Studying in Spain Ruoshi Wang	697–706
"Normal" & "Ambiguous": How Undergraduate Engineering Students Describe Stress Karin J. Jensen, Andrea J. Kunze, Thomas E. Romanchek, Kelly J. Cross and Joseph F. Mirabelli	707–720
Predictive Analysis of Engineering Students' Enrollment in Entrepreneurship Education Courses Prateek Shekhar and Carlos Felipe Rodriguez-Hernandez	721–736
Integrating Innovative Teaching Methods into Civil Engineering Education: A Case Study Weijing Yao, Chengjun Wang, Haiming Chen and Yushan Liu	737–752
Factors Influencing Student Engagement in Online Computer Science Courses Navid Yaghoubisharif, Shane A. Brown and Allyson Barlow	753–769

ary Terrain Expertise in the South African Army Engineer Corps: Competency Gaps and Curriculum Innovation Ngoepe, I. Henrico and H. A. P. Smit	770–785
Teaching Building Construction Technology Using a Participatory Learning Approach for Architectural Students: A Case Study Zhantang Miao, Yuxi Yang and Jiangtao du	786–796
Industry 4.0 and Industrial Engineering Education: Perspectives from Researchers Mary Anny M. S. Lemstra and Marco Aurélio de Mesquita	797–807
Establishing Quality Standards for Empirical Studies using Mixed-methods Designs in Engineering Education Research Jutshi Agarwal and Gibin Raju	808-820
Guide for Authors	821
