Contents

Section I

Special Issue

Computational Thinking in Engineering Education for Addressing Complexity

Guest Editors

Inés Alvarez-Icaza[1], Luis Magdiel Oliva-Córdova[1,2] José Luis Martín-Núñez[3] and Rasikh Tariq[1]

Editorial 281
Ahmad Ibrahim

Exploring Complex Thinking Competency within a Computational Thinking Digital Ecosystem: A Study Aligned with Sustainable Development Goals 282–292
Maria-Soledad Ramirez-Montoya, Azeneth Patino and Klinge Villalba-Condori

How To Approach STEM in K–12: A Hands-On Proposal for Teacher Training on Computational Thinking 293–299
Juan José Santaengracia, Luis J. Rodríguez-Muñiz and Belén Palop

Integrating Computational and AI Thinking in Computer Science Education: A Case Study of "Software Design and Architecture" 300–308
Yan Huang, Ting Chen and Huidong Zhu

Model-driven Approach to Introduce Computational Thinking into Engineering Education: The STEM Perspective 309–319
Renata Burbaitė, Vytautas Štuikys, Sigitas Drsutis, Mikas Binkis and Giedrius Ziberkas

Computational Thinking: Challenges for the Training of Future Computer Engineering Professionals in Colombia – A Systematic Mapping 320–331
Olga Najar-Sánchez, Erla M. Morales Morgado, Alba Catherine Alves-Noreña and Milena Rocío Castillo-García

Computational Thinking as an Instructional Model for the Development of Digital Competences: An Experience in a University SPOC 332–348
Maylin Suleny Bojórquez-Roque, Antonio Garcia-Cabot, Eva Garcia-Lopez, Héctor R. Amado-Salvatierra and Carlos Enrique George-Reyes

Development of Computational Thinking and Educational Equity in Engineering Students of Both Genders Through a STEM Educational Kit 349–363
Ronald Paucar-Curasma, Claudia Acra-Despradel, Roberto Florentino Unsihuay Tovar, Rosa Quispe Llamoca, Juan Humberto Quijada Villegas and Klinge Orlando Villalba-Condori

Section II

Contributions in: Creativity, Graduate Attributes, Manufacturing, Students' Engagement, Well-Being, Sketching, Active Learning, Social Cognitions, Self-Efficacy, Marketspaces, Students Assets, Process Safety, Problem Solving, Entrepreneurship, Assessment, Biomedical Engineering, Laboratory Safety, After Class Learning, Students' Satisfaction

Exploring the Space in Context: Factors Impacting Engineering Students' Divergent Thinking during Projects 364–377
Shannon M. Clancy, Shanna R. Daly and Colleen M. Seifert

Developing a Word Code File to link Learning Outcomes to Graduate Attributes in an Engineering Curriculum 378–387
Arthur James Swart and Pierre Eduard Hertzog

An Online Tool for Learning Material Requirements Planning in a Computer Integrated Manufacturing Course – A Case Study 388–400
Biljana Cvetic, Milos Danilovic and Miljana Lukovic

Responsible Transformation of Education Through Engineering Students' Perceptions of Well-Being 401–412
Katarina Petrović, Dragan LJ. Bjelica, Marko Mihić, Dejana Pavlović, Duško Bodroža, Mihajlo Djukić, Elena Jovičić, and Zorica Mitrović

Sketching in Mechanical Engineering Curriculum – Students' Perspective 413–426
Donna Jaison, Saira Anwar, Karen Rambo-Hernandez, Jonan PhilLip Donaldson, Tracy Hammond and Karan L. Watson

Student Perceptions of Instructional Activities, Engagement, and Performance in an Undergraduate Systems Analysis and Design Course 427–439
Syeda Fizza Ali, Umer Farooq, Daniel Bahng, Alejandra J. Magana and Saira Anwar

Impact of Instructional Strategies on Engineering-Related Social Cognitions Implemented via a Faculty Learning Community 440–454
Sarah L Orton, Fan Yu, Rose Marra and Lisa Y. Flores

Improving the Student Makerspace Experience by Using Crowdsourcing to Identify Common Build Failure 455–468
Ethan Gross and Nicholas A. Meisel

Making a Supportive Space: Supporting Student Assets in Makerspaces through the Lens of Community Cultural Wealth 469–482
Elisa Koolman and Anastasia M. Schauer

How Engineering Practitioners and Students react to Gaps between their Beliefs and Behaviors 483–495
Sherri Youssef, Amanda Singer Nault, Cayla Ritz, Brittany Butler-Morton, Emily Dringenberg, Cheryl A. Bodnar and Elif Eda Miskioğlu

Effect of Engineering Design-Based Teaching on Middle School Students' Creative Problem Solving and Entrepreneurship 496–507
Yusuf Kaplan, Hasan Bakirci and Yilmaz Kara

The Comprehensive Assessment of Student Engagement (CASE): Scale Development and Evaluation 508–522
Matthew W. Ohland, Misty L. Loughry and David J. Woehr

Assessing Knowledge, Attitudes, and Risk Perceptions of Laboratory Safety Among Biomedical Engineering Students: A Case Study 523–534
Ahmad O. Alokaily, Suhail S. Alshahrani, Ahmed A. Aldohbeyb, Soliman A. Alhudaithy, Abdulaziz S. Fakhouri, Mohammad K. Alsenaide and Abdulelah S. Alrebaish

Impact of After-class Learning Partners on the Academic Performance in Bioengineering Management Courses 535–548
Feng Dong, Yunmiao Gui, Xueyong Liu, Chao Shen, Yonghong Cheng and Zhi Liu

Factors Influencing Engaged Learning Among Engineering Undergraduates 549–557
Xia Zhao, Jing Yan, Parthasarathy, Ranganathan, Kejun Wen, Shihui Liu and Lin Li

Guide for Authors (2026) 558
