Section I

Special Issue

Sustainable Development Goals in Engineering Education

Guest Editor

Pao-Nan Chou

National Pingtung University of Science and Technology, Taiwan

Editorial	559
<i>Ahmad Ibrahim</i>	
Guest Editorial	560–563
Sustainable Development Goals in Engineering Education	
<i>Pao-Nan Chou</i>	
Integrating Computer Vision and Deep Learning for Sustainable Development in Engineering Education: A Case Study in Electronics and Circuits Laboratories	564–576
<i>Shih-Yeh Chen, Ying-Hsun Lai, Wei-Cheng Chen, Patrick C.K. Hung and Chin-Feng Lai</i>	
Sustainable Development Goals In Engineering Education: a Low-Carbon-Oriented Practical Teaching Framework	577–589
<i>Wenfang Zhang, Ligang Wang and Hangyang Li</i>	
The Process of Aligning Engineering Instructors' Values to Content, Assessment, and Pedagogy (VaCAP)	590–606
<i>Jorge Cristancho Rodríguez, Leonardo Pollettini Marcos, Héctor E. Rodríguez-Simmonds, Eugene L. D. Mahmoud and Angel G Enriquez Mujica</i>	
Sustainable Development Goals in Vehicle Engineering: Utilizing the Technology Acceptance Model to Analyze Tesla Owners	607–612
<i>Hsueh-Kuei Fan, Pao-Nan Chou and Yu-Hsin Christine Chou</i>	
Sustainability Aspects of Core Engineering Programs in View of Increasing Demand for Computer Science Related Programs	613–625
<i>Rayapati Subbarao</i>	
Engineering in K-12: Micro:bit Projects with SDGs	626–632
<i>Sheng-Yi Wu and Hong-Jhe Lin</i>	
Contemporary Research on AI Integration for Sustainability Education within STEM and Engineering Curricula: A Systematic Mapping Review	633–645
<i>Ai-Jou Pan and W. G. Will Zhao</i>	

Section II

Contributions in: Curriculum Assessment, Motivation, Behavioral Engagement, Self Efficacy, Belonging, Design Thinking, Engineering Judgment, PBL, First Year Engineering, Student Success, Entrepreneurial Characteristics, Teaching Effectiveness, Postgraduate Education, Civil Engineering, Mechanical Engineering, Technology Fairs, Differential Instructions, AI-Based Learning Tools, Learning Strategies, STEM, Teaching with Stories

Impact of Two Decades of Continuous Development on Advancing a Civil Engineering Graduate Program with a Global Vision	646–659
<i>Aman Mwafy and Bilal El-Ariss</i>	
Impact of Major Switching Intention of Engineering Students on their Behavioral Engagement	660–675
<i>Shaoyan Wu, Miao Xue and Juanlan Liang</i>	
Programming Self-Efficacy is Moderated by an Ecological Belonging Intervention, Race/Ethnicity, and Gender	676–690
<i>Matthew Bahnson, Allison Godwin and Linda DeAnglo</i>	

Using Cardboard Blocks to Investigate Elementary Students' Engineering Design Thinking Strategies <i>Sheng-Yi Wu and Pao-Nan Chou</i>	691–698
Empirical Insight on Students' Use of Engineering Judgment during Projects <i>Renee M. Clark and Samuel J. Dickerson</i>	699–708
Academic Performance of First-Year Engineering Students: A Systematic Literature Review <i>Ana Aparicio Colino, Jose Luis Arroyo-Barrigüete and Carmen Sánchez Ávila</i>	709–727
Comparative Analysis of Entrepreneurial Characteristics between Engineering and Engineering Technology Students <i>Oai Ha and Vivek Singhal</i>	728–743
Relationship Between Research Productivity and Teaching Effectiveness in Engineering Education: A Qualitative Study in Taiwan <i>Pao-Nan Chou</i>	744–754
Comparing Postgraduate Education Models in Civil Engineering: A Case Study of China and Singapore <i>Weijing Yao, Hao Zhang and Qinghe Zhang</i>	755–769
Integrating Morphological Analysis and Design of Experiments into First-Year Mechanical Engineering Education <i>Feng-Ming Ou</i>	770–781
The Impact of Environmental Research and Technology Fairs on Students Academic Outcomes: A Pre- and Post- Pandemic Analysis <i>Elizabeth C. Ore and Dante M. Garcia</i>	782–789
Implementation and Assessment of a Cost-Effective Model for Differentiated Instructions in an Undergraduate Electrical and Electronic Technology Course <i>Xiaoliang Zhang, Tingting Chen, Weiwei Shao and Songlin Zhou</i>	790–798
Revolution or Reliance? The Dual Impact of AI-Based Learning Tools on College Students' Academic Skills <i>Oenardi Lawanto, Cassandra McCall, Wade Goodridge, Zain Ul Abideen and Talha Naqash</i>	799–817
Teaching with Stories: Exploring the Effects of Narrative-Driven Engineering Curriculum for Middle School Students and Teachers <i>Jeremiah Pina, Sahara Pradhan, Rebecca Mazur, Glenn Ellis and Al Rudnitsky</i>	818–834
Guide for Authors (2026)	835
