

Contents

Contributions in: Accreditation, Belonging, Biomechanics, Civil Engineering, Course Relevance, Design Thinking, Direct Pathways, Engineering Ethics, Entrepreneurship, Faculty Adaptability, First-Year Students, Flipped Classroom, Graduate Education, Innovation, International Students, Learning Outcomes, Legal Skills, Motivation, Personalized Learning, Self-Efficacy, Assessment, Software Engineering, Student Absenteeism, Teaching Evaluation, Team Characteristics

Guest Editorial	837
<i>Tom Dunphy</i>	
Impact of Teaching Using Finite Element Modeling on Biomechanics Students' Application Performance and Conceptual Understanding	838–849
<i>Stepan Hubalovsky and Marie Hubalovska</i>	
Creative Life Balance: How Creative Hobbies Support Skill Transfer and Well-being in Graduate Engineering Education	850–863
<i>Autumn R. Deitrick and Catherine G. P. Berdanier</i>	
Teaching Human Critical Success Factors in a First-Year Software Engineering Module	864–877
<i>Maria Monserrat, Antonio Crespi, Antonia Mas and Antoni-Lluís Mesquida</i>	
Development and Evaluation of an AI-Enhanced Learning System to Bridge Technical and Linguistic Barriers for International Students in Taiwan	878–891
<i>Bo-Siang Chen, Chun-Nan Cheng, Jing-Tang Sie, Wei-Lun Huang, Wei-Sho Ho, Ying-Ju Tseng, Bo-Yuan Tseng, Ching-Yi Lai, De-Shau Huang and Pao-Chung Shin</i>	
An Automated ABET Outcome Assessment System and Continuous Quality Improvement	892–903
<i>Muhammad Awais, Muhammad Khawar Islam, Muhammad Amin, Ahmad H. Alferidi, Khaled N. Alqahtani and Emad H. Abualsauod</i>	
Construction and Validation of a Competence Framework for Interdisciplinary Legal Skills in Civil Engineering	904–917
<i>Yan Li, Yu He, Xinying Cao and Yue Teng</i>	
An Approach to Study Associations Between Team Characteristics and Team Outcomes and the Mediating and Moderation Effects of Intermediate Team Outcomes in Two-Semester Senior Design Courses	918–934
<i>Shun Takai, Elizabeth A. DeBartolo, Gregory Barker and Manikanta Guthula</i>	
Problem-Centered Design Thinking to Enhance Innovation and Entrepreneurship Competencies among Engineering Undergraduates	935–948
<i>Mao-Yuan Pai, Cheng-Lung Tsai, Sheng-Wen Hsieh and Chih-Chao Chung</i>	
Engineering Faculty Views on Essential Engineering Knowledge and Efforts Toward Course Content Relevance	949–957
<i>Berenice A. Cabrera, Lu Zhou, Lisa R. Lattuca, Erika A. Mosyjowski, Shanna R. Daly and Joi-Lynn Mondisa</i>	
Linking Motivation and Learning Strategy Changes to Learning Outcomes in a Flipped Engineering Laboratory	958–971
<i>Hyunkyung Lee, Daeun Jung and Hyungjin Kim</i>	
The Role of University Educators in Reducing Absenteeism among Engineering Undergraduates	972–990
<i>Elisabet Mas de les Valls, Marcella Castells-Sanabra, Roser Capdevila, Roger Castells-Martínez, Claudia Barahona-Fuentes, Clara Borén, Anna Muijal-Colilles and Vicente Medina</i>	
“It’s All My Friends Who Know It. It’s Not Me:” Engineering Students’ Descriptions of Challenges in a First-Year Programming Course	991–1005
<i>Jacqueline Rohde, Carlie Cooper, Kevin Kaufman-Ortiz, Natascha Buswell, Allison Godwin and Linda Deangelo</i>	
Design and Assessment of a Hybrid Teaching Model for Teaching Internet of Things Hardware Technology	1006–1017
<i>Jiaven Li, Chen Ling, Xinyu Wu, Qiong Nie, Xindi Zhang, Yani Zheng, Huimin Zhao, Jinchang Ren and Rongjun Chen</i>	
Willingness for Adaptability of Engineering Faculty in Two Curricular Change Contexts	1018–1034
<i>Hadi Ali, Jennifer Bekki, Rod D. Roscoe and Ann McKenna</i>	
Impact of Intelligent Tutoring Systems on Student Engagement and Learning Outcomes in Higher Education: A Scoping Review of Engineering Education Applications	1035–1055
<i>Yi Li and Chen Hongmei</i>	
New, Relearned, and Lost Information: A Comparison of Returner and Direct Pathway Graduate Engineering Students	1056–1067
<i>Elaine Eggenberger, Diane L. Peters and Elizabeth Gross</i>	

A Conceptual Engineering Doctoral Program Accreditation Framework <i>Faical Mnif</i>	1068–1077
The Development and Practice of Engineering Ethics Education for Master’s-Level Engineering Students at a Shanghai University: A Case Study <i>Fangfang Wang, Xu Li and Guangli Xiu</i>	1078–1089
Validating an Instrument to Measure Entrepreneurial Self-Efficacy among Engineering Students <i>Aturika Bhatnagar and Prateek Shekhar</i>	1090–1101
Developing Managerial Competencies Among Engineering Students: An Experimental Study <i>Ivana Kužet, Ivana Kovačević, Mateja Manojlović, Jelena Anđelković Labrović and Nikola Petrović</i>	1102–1115
Improving Programming Learning Outcomes for AI-Driven Students using a Digital Assessment Environment <i>Zhanat Nurbekova, Ainur Sagimbayeva, Gaukhar Aimicheva, Asset Zhaksylykov, Aizhan Nazyrova and Nurbol Artykbayev</i>	1116–1130
Characteristics and Optimization Strategies of Teaching Evaluation Policies of China’s Engineering Education <i>Qiaoli Chang, Xinyu Wang and Dexin Hu</i>	1131–1142
Mapping the Intellectual Landscape of AI-Driven Innovation in Engineering Education <i>Yi-rong Tan</i>	1143–1154
Guide for Authors (2026)	1155
