

Contents

Contributions in: Nontraditional Students, Generative AI, Resilience, Online Learning, Large Language Models, Competency Indicator, First-Year Students, Entrepreneurial Mindset Teacher-Student Interaction, First Generation Students, Engineering Identity, PBL, Autonomy, Diversity, Innovation, Virtual Mentorship, Industry-Academia, Human-AI Collaboration, Entrepreneurial Readiness, Learning Style, Accreditation, Conceptual Understanding, Outcome-Based Education, Underrepresented Groups, Blended Learning, CNC Machining, Environmental Engineering, Manufacturing Engineering, IC Design, Engineering Programming, Biomedical Engineering, Software Testing, Thermodynamics, Image Processing, Mechanical Design

Editorial	1157
<i>Ahmad Ibrahim</i>	
Understanding the Experiences of Nontraditional Students in Engineering: A Thematic Analysis to Inform Pedagogical Support	1158–1171
<i>Cory Brozina and Claudio De Freitas</i>	
Impact of Collaboration Forms on the Process and Outcomes of Sustainable Design Learning in Engineering Education	1172–1183
<i>Yaoquan Zhuge</i>	
Effects of a Resilience-Enhanced Training Model on Precision Performance and Anxiety Reduction in CNC Machining Education	1184–1191
<i>Jen Sheng Yang, Ching Hsien Lin and Tzu Wen Chen</i>	
Understanding Best Practice Competencies in Online Learning: A Multidimensional Structural Equation Modeling Analysis	1192–1200
<i>P. J. Thomas, Hieng Ho Lau, Bibiana Chiu-Yiong Lim and Ajay Kapoor</i>	
A Framework for Integrating Generative AI into an Environmental Engineering Curriculum	1201–1214
<i>Chunpeng Zhang, Lujian Fan, Shoukai Yu, Zifang Chi and Chuanyu Qin</i>	
A Competency Framework for Semiconductor Packaging and Sustainable Manufacturing Education	1215–1227
<i>Hsin-Kuo Liao, Hsiu-Chou Yu, Shi-Jia Huang, Si-Xian Li, Chin-Wen Liao and Tang-Wei Yang</i>	
Instructor and Student Personality Type Correlations and Academic Success for First Year Engineering Technology Students	1228–1241
<i>Michael Justason, Hoda Kamel and Mila Serafimovska</i>	
What Do Practitioners Believe Comprises an Entrepreneurial Mindset? Community Reactions to Literature-Based Conceptions of Curiosity, Creating Value, and Connections	1242–1253
<i>Darby Riley, Prateek Shekhar, Eduardo Rodriguez Mejia, Cheryl Bodnar, Adam Carberry and Samantha Brunhaver</i>	
A Water Transportation Experiment for Teaching Chemical Process Control	1254–1263
<i>Zejun Hu, Jiajun Feng, Jie Xiao, Peng Wu and Xiao Dong Chen</i>	
Demographic, Academic and Social-Psychological Predictors of Participation in an Undergraduate Engineering Co-Curricular Program	1264–1280
<i>Sandra M. Way, Hengameh Bayat, Wendy C. Chi, Catherine E. Brewer and Hannah Huvar</i>	
How Project-Based Learning Builds Entrepreneurial Intention: The Mediating Roles of Autonomy, Competence, and Relatedness	1281–1289
<i>Elfizon, Muhammad Anwar, Hendra Hidayat and Elsa Sabrina</i>	
Relationships Over Reach: Program Leader Perspectives on Recruiting for Engineering Bridge and Success Programs	1290–1308
<i>Xinyu Zhang, Lynnette Michaluk, Roneisha Worthy, David Miller and Joseph Grabczynski</i>	
A Generative AI Framework for IC Design Education: Virtual Mentoring for I2C Verification Skill Acquisition	1309–1316
<i>Chin-Wen Liao, Chih-Yu Tsai and Sheng-Jhih Lyu</i>	
Human-AI Collaboration as a Pedagogical Tool for An Introductory Engineering Programming Course	1317–1328
<i>Mehran Andalibi, Angelynn Alvarez, Cameron Williams, Oyku Eren Ozsoy, Luis Felipe Zapata-Rivera and Sameer Abufardeh</i>	
Bridging the Innovation Gap: Analysis of Biomedical Engineering Entrepreneurial Readiness in a Low-Resource Ecosystem	1329–1340
<i>Linda Essilfie, Precious Obinna, Peter Prempeh, Wendy Bagonluri and Hephzi Tagoe</i>	

A Community-Developed Framework for Entrepreneurial Mindset in First-Year Engineering <i>Kaitlin Mallouk, Krista M. Kecskemety, J. Blake Hylton and Jack Bringardner</i>	1341–1349
Student Expectations and Learning Styles in a Bilingual Materials Science and Engineering Course: Cognitive Profiles and Language-Mediated Learning <i>Ivan D. Arellano-Ramirez, Enrique D. Arias Castaño and Nancy J. Castillo Rodriguez</i>	1350–1360
Development and Effectiveness Evaluation of an Online Experimental Teaching System for Software Testing <i>Zhiyan Zhang</i>	1361–1371
Identifying and Classifying Conceptual Difficulties in Thermodynamics: A Systemic Perspective Based on Student Performance <i>A. Vallés Lluch</i>	1372–1382
An Outcome-Driven and Project-Based Participatory Learning Model for Enhanced Student Competency in Image Processing <i>Jujian Lv, Xinyi Tang, Kangxin Liu, Ruiqu Feng, Kaihan Lin, Rongjun Chen, Jinchang Ren and Jiawen Li</i>	1383–1393
Designing Engineers: Impact of an Extra Curricular Intensive Design Program on Students' Engineering Self-Efficacy, Values, and Identity <i>Tobin N. Walton, Jared Webb, Uzoma M. Monye and Stephen Knisley</i>	1394–1408
A VR-Based Assembly Teaching Platform for Mechanical Design Course: Development and Educational Impact <i>Jun Zhang, Xiaoya Su, Qianqian Lu and Yangfang Wu</i>	1409–1421
Guide for Authors (2026)	1422
