

# SPECIAL DOUBLE ISSUE

## Volume 17 Numbers 4 and 5

### Design Education for the 21st Century

Guest Editors: Clive Dym and Sheri Sheppard

#### Contents

M. S. Wald	321	Editorial
C. L. Dym and S. D. Sheppard	322–323	Introduction and Overview
J. W. Wesner	324–326	Key Learnings and Commitments from Mudd Design Workshop II
<i>'People' Issues</i>		
R. A. Faste	327–331	The Human Challenge in Engineering Design
F. J. Fronczak	332–335	Design Engineers—Fast, Cheap, or Good—Pick Any Two of the Three
B. Bender	336–342	Concepts for Purposive and Motivational Teaching and Learning in Engineering Design Courses
<i>Teams and Collaboration</i>		
P. L. Hirsch, B. L. Shwom, C. Yarnoff, J. C. Anderson, D. M. Kelso, G. B. Olson and J. E. Colgate	343–348	Engineering Design and Communication: The Case for Interdisciplinary Collaboration
S. Kuhn	349–352	Learning from the Architecture Studio: Implications for Project-Based Pedagogy
D. G. Taylor, S. P. Magleby, R. H. Todd and A. R. Parkinson	353–358	Training Faculty to Coach Capstone Design Teams
N. J. Delson	359–366	Increasing Team Motivation in Engineering Design Courses
<i>Products and Projects</i>		
D. Harris	367–369	A Case for Project-Based Design Education
P. E. Doepker	370–374	Integrating the Product Realization Process into the Design Curriculum
R. E. Apfel and N. Jeremijenko	375–380	SynThesis: Integrating Real World Product Design and Business Development with the Challenges of Innovative Instruction
C. D. Pionke, J. R. Parsons, J. E. Seat, F. E. Weber and D. C. Yoder	381–385	Balancing Capability, Enthusiasm and Methodology in a First-Year Design Program
T. M. Regan, J. W. Dally, P. F. Cunniff, G. Zhang and L. Schmidt	386–390	Curriculum-Integrated Engineering Design and Product Realization
C. L. Caenepeel and C. Wyrick	391–395	Strategies for Successful Interdisciplinary Projects: A California State Polytechnic University, Pomona, Perspective
R. M. Counce, J. M. Holmes and R. A. Reimer	396–399	An Honors Capstone Design Experience Utilizing Authentic Industrial Projects
S. P. Magleby, R. H. Todd, D. L. Pugh and C. D. Sorensen	400–405	Selecting Appropriate Industrial Projects for Capstone Design Programs
P. Little and J. King	406–409	Selection Criteria for Cornerstone and Capstone Design Projects
D. M. Cannon and L. J. Leifer	410–415	Product-Based Learning in an Overseas Study Program: The ME110K Course
B. I. Hyman	416–420	From Capstone to Cornerstone: A New Paradigm for Design Education
<i>Science and systems for the design toolbox</i>		
T. R. Kurfess	421–425	Challenges and Directions for Integrating Mechatronics into Early Design
R. Fruchter	426–430	Dimensions of Teamwork Education
W. H. Wood	431–435	Unifying Design Education through Decision Theory

<b>B. Linder and W. C. Flowers</b>	436–439	Integrating Engineering Science and Design: A Definition and Discussion
<b>S. D. Sheppard</b>	440–445	The Compatibility (or Incompatibility) of How we Teach Engineering Design and Analysis
<b>T. Arciszewski and S. Lakmazaheri</b>	446–454	Structural Design Education for the 21st Century
<b>C. Briggs</b>	455–459	On the Role of CAx in Design Education
<b>S. J. Lukasik and M. Erlinger</b>	460–467	Educating Designers of Complex Systems: Information Networks as a Testbed
<b>G. B. Olson</b>	468–471	Brains of Steel: Mind Melding with Materials
<i>Assessment</i>		
<b>K. F. Yoshino</b>	472–475	Design and Assessment: Theory and Practice
<b>J. R. Phillips and Z. H. Duron</b>	476–478	Assessment in the Light (?) of ABET Accreditation Criteria
<b>J. A. Shacowitz</b>	479–482	Teaching Design by Integration throughout the Curriculum and Assessing the Curriculum using Design Projects
<b>P. E. Doepker</b>	483–488	Department Assessment and the Design Course: A Model for Continuous Improvement
<b>J. M. Feland III and L. J. Leifer</b>	489–492	Requirement Volatility Metrics as an Assessment Instrument for Design Team Performance Prediction
