Contents

Part I
Special Issue
Trends in Agricultural, Biosystems and Biological Engineering Education (II)
Guest Editors: Joel Cuello, University of Arizona and Linus Opara, Sultan Qaboos University, Sultanate of Oman

M. S. Wald 1121 Editorial
L. Opara and J. Cuello 1122 Guest Editorial

(a) Curriculum Reform, Assessment and Accreditation

W. T. Monroe, M. Mailander and M. Lima 1129–1138 Focus on Experiential Education: A Freshman Engineering Program in Biological Engineering
L. U. Opara, J. S. Perret and D. B. Ampratwum 1139–1148 The Evolution of Agricultural Engineering Education and Curriculum Reform at Sultan Qaboos University
T. A. Costello and D. J. Carrier 1149–1156 Emergence of Biological Engineering at the University of Arkansas
R. L. Bengtson 1157–1162 Louisiana State University’s Biological Engineering Program
T. J. Brumm, S. K. Mickelson, B. L. Steward and A. L. Kaleita 1163–1172 Competency-based Outcomes Assessment for Agricultural Engineering Programs
P. H. King and J. C. Collins 1173–1181 Ethical and Professional Training of Biomedical Engineers
A. R. M. Shariff 1182–1188 ISO Certified Biological and Agricultural Engineering Tertiary

(b) Simulation, Resource Management and Field Demonstration Tools

E. R. Benson C. Krawczyk and G. F. Figueredo 1189–1196 Evaluation of Tablet and Laptop Computers in Field and Laboratory Settings
F. Rodriguez, M. Berenguel, J. L. Guzmán and S. Dormido 1197–1209 A Virtual Course on Automation of Agricultural Systems
M. Omid 1219–1223 Introducing Simulation Software as an Educational Tool to Enhance Student Understanding of Tractor Field Performance
A. Šorgo and S. Kocijancic 1224–1230 Demonstration of biological processes in lakes and fishponds through computerised laboratory practice
H. Sumali 1231–1240 Developing a Laboratory Course in Sensors and Data Acquisition for Agricultural Engineering

Part II
Contributions in: Engineering Education Research, Engineering Design, Engineering Ethics, Control Engineering, Industrial Engineering and Geotechnical Engineering

F. Bullen and D. Knight 1241–1251 The Broad and Strategic Value of the Freshmen Engineering Experience—FEE
D. Oehlers and D. Walker 1261–1268 Assessment of Deep Learning Ability for Problem Solvers
C. Williams and F. Mistree 1269–1280 Empowering Students to Learn how to Learn: Mass Customization of a Graduate Engineering Design Course
Y. Zhao 1281–1286 How to Design and Interpret a Multiple-Choice-Question Test: A Probabilistic Approach

T. P. Rich 1287–1296 Lessons in Social Responsibility from the Austin Dam Failure

J. Petric and Z. Šitum 1297–1303 Pneumatic Balancing Mechanisms in Control Education

M. D. Bovea and A. Gallardo 1319–1324 Work Placements and the Final Year Project: A Joint Experience in the Industrial Engineering Degree
